

Braintree Town Council

ORDER NO: 18 009

DATE FILED: JANUARY 30, 2018

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

To install and maintain approximately 290 feet of 4 inch gas main in Vinedale Rd, from the existing 2 inch main at the intersection of Pleasant View Av to the intersection of Glenrose Av approximately 110 feet new 4 inch gas main in Glenrose Av into the driveway to 150 Potter Road (BELD) in order to replace and abandon the existing gas main sections in Vinedale Rd and Glenrose Ave.

BELD: Engineering should be notified in advance of any excavation to be performed in close proximity to this line. BELD will provide onsite support and safety personnel at no cost to the project. BELD also has a 13,800 volt underground system on the road. This is a concrete encased duct bank to be identified through the Dig safe process.

BELD engineering would like to have a clear blueprint on areas being excavated and also an onsite meeting prior to work being done.

DPW: Vindale Rd and Glenrose Av were both shimmed and micro-surfaced in 2010 and so predate the current moratorium and are out of the prior moratorium. We recommend approval under the standard conditions and that the approval be conditioned upon the petitioner 1.) expediting the work on Glenrose Av as the Town will be replacing the water main there this season; 2.) laying the gas main outside of the trench of the water and sewer mains in service; 3.) not leaving the trench pavement low for any length of time; and 4.) repairing or replacing curbs and sidewalk areas disturbed each to the satisfaction of the Highway Superintendent. We note that the area labelled on the plans as "Harbor Villa Av" is not a street but a driveway to 150 Potter Rd and so is not subject to the grant of location requirement. (It does cross an unconstructed section of Harbor Villa.) We also recommend that the following requirement be added to the permit, if granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
