

Braintree Town Council

ORDER NO: 18 014

DATE FILED: FEBRUARY 13, 2018

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

**To install and maintain approximately 750 feet of 2 inch gas main in Shaw St from the existing 3 inch main in Edgemont Rd southerly to Allen St and approximately 122 feet of 2 inch main in Allen St from the existing 2 inch main near pole #15 westerly to the existing 3 inch gas main at house #125 Allen St all of which to replace and abandon the existing 2 inch and 3 inch gas mains in Shaw St and Allen St.**

**BELD:** Please note, BELD has a 13,800 volt underground system on these roads. This is a concrete encased duct bank to be identified through the Dig safe process.

BELD engineering would like to have a clear blueprint on areas being excavated and also an onsite meeting prior to work being done.

**DPW:** Shaw St is not under a moratorium on road openings and is scheduled to have its water main replaced this year. Allen St is not under a moratorium and is scheduled to begin reconstruction this year. We recommend approval under the standard conditions and that the approval be further conditioned upon the petitioner 1.) expediting the work on Shaw St as the Town will be replacing the water main there this season; 2.) laying the gas main outside of the trench of the water and sewer mains in service; 3.) not leaving the trench pavement low for any length of time; and 4.) repairing or replacing curbs and sidewalk areas disturbed each to the satisfaction of the Highway Superintendent. We also recommend that the following requirement be added to the permit, if granted:

Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department.
