COVID-19 Prevention

Wash hands with soap and water for 20 seconds

Use hand sanitizer

Avoid touching eyes, nose and mouth

How COVID-19 Spreads

Respiratory droplets

Contaminated surfaces

People in close contact (6 feet)

People are thought to be at their most contagious when they are at their most symptomatic. Some spread might be possible before people show symptoms, but this is not thought to be the main way the virus is spread.

If you come into close contact with someone with COVID-19 for a prolonged period:

- Monitor your health. If you develop symptoms call ahead to your doctor.
- Call your local health department for further instructions.

Braintree Health Division: 781-794-8090

COVID-19 Symptoms

Fever

Cough

Shortness of breath

Symptoms may appear 2-14 days after exposure.
