

Braintree Town Council

ORDER NO: 22 022

DATE FILED: APRIL 5, 2022

REQUEST OF: NATIONAL GRID

National Grid hereby respectfully requests your consent to the locations of mains as hereinafter described for the transmission and distribution of gas in and under the following public streets, lanes, highways, and places of the Town of Braintree and of the pipes, valves, governors, manholes and other structures, fixtures and appurtenances designed or intended to protect or operate said mains and accomplish the objects of said Company; and the digging up and opening the ground to lay or place same:

National Grid hereby requests to relay approximately 560 feet of 1.5-inch bare steel (1960) with approximately 560 feet of 2-inch plastic in Sherbrooke Ave from Washington St to #50 Sherbrook Ave, and approximately 395 feet of 1.5-inch bare steel (1941) and approximately 450 feet of 2-inch plastic (1975) with approximately 845 feet of 2- inch plastic in Robinson Ave. from Washington St. to #68 Robinson Ave. with Staff Recommendations:

BELD: No Conflicts with BELD

DPW: The DPW has reviewed the subject petition and the accompanying sketch for the gas main replacement on Sherbrooke Avenue and Robinson Avenue. The work is being proposed to eliminate aging gas infrastructure. These sections of Sherbrook Ave. and Robinson Ave. are not subject to the excavation moratorium. Sherbrook Ave. was last resurfaced by total reconstruction in 2012 and is excellent condition. Robinson Ave. was last resurfaced with a micro-surfacing in 2008 and is in fair condition. The DPW recommends the following conditions for this petition, if it is to be granted:

- A temporary patch shall be placed immediately after the work. The street excavation should be saw-cut, backfilled and compacted in 8-inch lifts, paved to match existing asphalt depth (with a minimum depth of four inches) in two-inch lifts to match the existing street grade.
- After maintaining the temporary patch through one winter, a permanent patch shall be placed the following spring. The permanent repair on Sherbrook Ave. shall be a curb-to-crown mill and overlay with a pavement depth 1.5 inches. The permanent repair on Robinson Ave. shall be a 1.5-inch "grind and inlay" patch, encompassing the width of the original trench plus one foot on each side. If the permanent patch falls within 2 feet of the roadway edge, the patch shall extend completely to the gutter.

Braintree Town Council

ORDER NO: 22 022

PAGE 2 OF 2

We also recommend that the following requirements be added to the permit, if it is to be granted:

- National Grid must arrange a pre-construction meeting with Braintree the DPW to discuss utility corridor assignment. The new gas mains must not encroach on any existing utilities.
- Neither National Grid nor any of its contractors is authorized to close any street or to close a direction of travel to facilitate their work without authorization from the Director of the Department of Public Works or the Highway Superintendent. The Chief of Police can also authorize a closure for a police or fire emergency. Construction zone traffic safety issues are to be addressed by using appropriate traffic control signs and devices and the use of police officers for traffic control to safely guide traffic through the work zone. If a closure is authorized by the DPW, it shall not be implemented until signs and police officers (where needed) are properly in place in conformity with the written plan prepared by the contractor's engineer and approved by the DPW and Police Department."
